Skills

CMS & Frameworks

Skilled in DNN (DotNetNuke) Content Management System, ASP.NET Core, ADO.NET Core and Node.js (Express).

Languages

C#, JavaScript, PHP, React, Angular, Java

Databases

SQL Server, PostgreSQL, MySQL, SQLite

Hardware & Tools

ZK iFace Biometric Integration, Git, IIS, Render, Background Services, Dynamic web operation using JSON, Docker.

Soft Skills

Modular System Design, Technical Documentation, Hardware-Software Interfacing.

Information Technology graduate (BSc) from Hawassa University Institute of Technology with a strong focus on **enterprise-level modular systems**. Skilled in **DotNetNuke (DNN) CMS** and **Full-Stack .NET** development, with additional hands-on experience in **Node.js (Express)** and **dynamic web development** – including **online marketing websites** and **school-based online test platforms** built with **JSON-driven architectures**. Proficient in enterprise-level **database design, normalization and advanced database management including stored procedures, SQL Server Agent jobs and views**. Proven ability to bridge the gap between **hardware and software** through **biometric integration projects**, with **solid experience** in software deployment and **hosting** via **IIS (Internet Information Services)**. Passionate about architecting scalable solutions, from clinical management systems to automated attendance tracking.

Education

Hawassa University Bachelor of Science (BSC) • CGPA 3.45
Information Technology (IT)
Hawassa, Sidama, Ethiopia • 27th Feb 2023 - 20th June 2026
<https://www.hu.edu.et>

Experience

XOKA IT SOLUTION PLC Addis Ababa, Ethiopia
Internship june 2025 - sep 2025

- **Biometric Integration:** Developed an Attendance Management module utilizing the ZK iFace 302 fingerprint hardware for real-time employee identification.
- **Background Services:** Engineered a C# .NET background service to automatically fetch and sync biometric data at precise intervals into a SQL Server database.
- **Full-Stack Workflow:** Built the frontend in Angular, managed complete server hosting and handled the end-to-end deployment process.
- **DNN CMS Integration:** Leveraged DotNetNuke's modular architecture to deploy and manage web application modules, configure user permissions and structure the portal – enabling seamless integration of the Angular frontend within the CMS environment.

Projects

HUCMS (Hawassa University Clinic Management System) | Lead Developer
Stack: React, C# ASP.NET, SQL Server, DNN CMS, IIS

- Developed an end-to-end medical platform for a university health center, utilizing **DNN CMS** to orchestrate complex user roles and multi-tenant access controls.
- Built a full-stack solution with a **React** frontend and a C# ASP.NET/ **SQL Server** backend deployed entirely on local **IIS** infrastructure.
- Digitized core clinical workflows and student administrative operations into high-performance, modular services:
- **Clinical Workflows:** Automated patient registration, diagnostics, lab testing, hospital referrals, and prescription dispensing.
- **Academic & Financial Services:** Built secure tracking modules to generate official medical certificates and process student pharmacy reimbursement claims.

Book Shelf Management System | Full-Stack Developer

Developed a containerized online bookstore platform using **ASP.NETCore (C#)** and hosted on **Render** via **Docker**, featuring localized development on **SQL Server** migrated to **PostgreSQL** for production.

The platform implements robust role-based access control (RBAC):

- **Users:** Restricted to managing (uploading, editing, deleting) their own book listings while maintaining read-only access to community uploads.
- **Administrators:** Granted global privileges to edit or delete any listing across the platform, alongside full user management capabilities (registration, permission provisioning, and access control).

Workflow Management System (BPM)

Stack: React, C# ASP.NET, SQL Server, DNN CMS, IIS

- Architected a local Business Process Management (BPM) system using the DNN CMS framework to simplify, automate, and orchestrate complex organizational workflows.
- Engineered a dynamic **React** frontend backed by C# ASP.NET and **SQL Server**, fully deployed and optimized on local **IIS** environments.
- Programmed robust workflow control logic across independent service modules, enforcing strict, automated state transitions across distinct multi-user roles.

HU Building Maintenance Project | Full stack developer

- Developed a specialized tracking and reporting tool using **PHP** for university infrastructure management.
- **Android Mobile App:** Developed a native Android application to extend the building maintenance system's reach to mobile users, enabling on-the-go tracking and reporting.

E-Commerce Product Showcase | Full-Stack Developer

Stack: React, ASP.NET Core Web API, JSON

- Engineered a decoupled, lightweight e-commerce product showcase leveraging a **React** frontend and ASP.NETCore Web API backend.
- Implemented a flexible, **JSON-driven data layer** to manage dynamic catalog rendering and updates without traditional database overhead.
- Developed a responsive, high-performance user interface optimized for seamless product exploration and multi-category filtering.

Online Examination Platform | Full-Stack Developer

Stack: React, ASP.NET Core Web API, JSON

- Developed a lightweight, highly responsive online testing platform tailored for universities and high schools.
- Engineered a fast, **JSON-driven architecture** to seamlessly stream real-time exam data, question banks, and grading results between the client and server.
- Designed a versatile backend to natively support multiple standardized exam formats and diverse institutional user levels, ensuring rapid deployment across academic environments.

TO WHOM IT MAY CONCERN

This is to certify that
YARED WORKU TELEGN
Graduated From Hawassa University
With
Bachelor of Science Degree in Information Technology
CGPA: 3.45 (Distinction)

He took Curriculum Based Exit Examination on Jun, 2026 G.C. and
Passed with score 76 out of 100

June 25, 2026 G.C

Issuance of original diploma and transcript awaits settlements of cost-sharing expenses or provision of the required services.

To Whom It May Concern

I am pleased to write this letter of recommendation for **Yared Worku Tegegn**, who has been an exceptional student in the Information Technology Department at Hawassa University. As the Department Head and Lecturer in the department, I have had the privilege of observing his growth and development over the past 4 years, and I can say without reservation that he is one of the most dedicated and talented students I have encountered.

Yared has consistently demonstrated a strong commitment to his academic pursuits. Throughout his time in our university, he has consistently demonstrated a high level of academic excellence, intellectual curiosity, and a passion for doing something new. His work is always thorough and insightful, often going above and beyond the requirements of assignments. He graduated with **Distinction**, which is a testament to his dedication and hard work. I have no doubt that **Yared** will continue to excel in his future endeavors.

Please feel free to contact me if you require any further information regarding **Yared's** capabilities.

Sincerely,

Abebe Fenta Mihiret
